

Professor Maree Gleeson

Professor Gleeson is the Director of the Hunter Medical Research Institute (HMRI), responsible for developing and implementing strategies to enhance health and medical research in the Hunter region of NSW, Australia. HMRI is a research partnership between the University of Newcastle, Hunter New England Health, and the Hunter community.

Professor Gleeson is an Immunologist and conducts research with the University of Newcastle and the Australian Institute of Sport on the impact of respiratory infections in elite athletes. The research has influenced the training of elite endurance athletes such as swimmers, runners, cyclists and triathletes. Other research focuses include the development of asthma and allergy in children and Sudden Infant Death Syndrome.
